

## So where can I buy peat-free?

**It is hard for gardeners to find peat-free products. Whether it's growing media or plants, peat-free items are not widely available at your average garden centre. This shouldn't be the case, and the more we show demand for peat-free products, the sooner we'll get them.**

Garden Organic would like to develop a guide to what products are available and where you can go to get them. We've made a start on a list, but we are urging manufacturers of peat-free growing media and nurseries specialising in peat-free plants to get in touch to help us develop it further. Alternatively, if you are a peat-free garden centre or nursery, then please get in touch by emailing [enquiry@gardenorganic.org.uk](mailto:enquiry@gardenorganic.org.uk)

You can also use the template letter download to demand a better choice of peat-free products at your local garden centre, supermarket or DIY retailer.
